

- Added image field so users can add images along with their recipes
- Added description field so users can follow along instructions

Frontend inspiration:

<https://damndelicious.net/> - I like how simple this one is, especially the featured section.

<https://apps.apple.com/us/app/tasty-recipes-cooking-videos/id1217456898> - I like the clean UI, as well as the ability to create grocery lists based on recipes.

<https://apps.apple.com/us/app/paprika-recipe-manager-3/id1303222868?ls=1> - I like the ability to meal plan and create grocery lists. The UI also looks very minimal and professional.
